

Arena A330 EZ Filler

Helping the Arena A330 Shipper perform better

The Arena **A330 EZ Filler** is an ergonomic accessory that enables the safe and easy filling of the Arena A330 Shipper™ when used with the Arena Air-Evac® and other Arena liners, allowing its use over a broad range of products.

The **A330 EZ Filler** allows a single operator to attach a fill hose to a prepositioned bag and easily move the bag and entire hose assembly into the Arena A330 Shipper™. The filler supports the weight of the bag, hose, and valve making bag loading quick, safe, and efficient. During the filling operation the hose rises, keeping it out of the way and positioning the valve for quick shut off. The hose position is also convenient for quick disconnect and repositioning of the filler.

When using the **EZ Filler** setup time is reduced increasing the potential number of totes that can be filled in a shift. The **A330 EZ Filler** is light weight and compact making it convenient to store and reposition. The frame of the **EZ Filler** is 304 stainless steel for durability and cleanliness. All product contact surfaces are easily disassembled for cleaning and repair, if necessary.

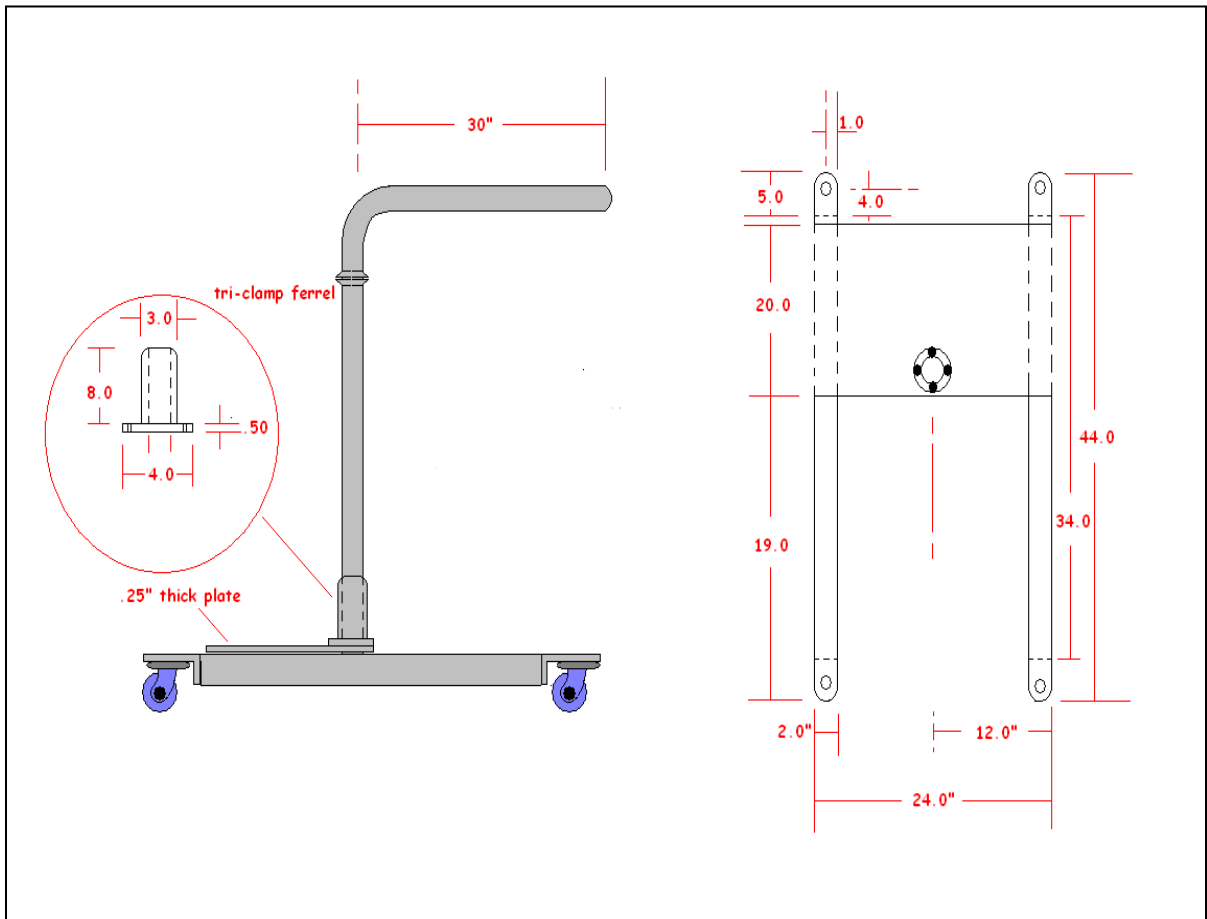

The filler requires no electrical or compressed air. The **Arena A330 EZ Filler** can be used with a wide range of hoses and connectors which can be quickly and easily changed. It has an integrated mounting platform should you wish to mount a pump or other equipment.

When used with the Arena 330 Shipper™ and Arena cassetted liners the filling operation requires minimal operator interface and provides for a quick, complete and mess free fill every time.

Arena A330 EZ Filler

Specifications	
Frame	Stainless steel
Casters	2 inch swivel solid polypropylene wheel
Outrigger wheel base length	44 inches
Outrigger wheel base width	24 inches
